Disclaimer

The laboratory has awarded with double certification ISO 9001 and EN ISO 13485 for its optimal quality on operational and medical management. The antigen-specific IgE/IgG is detected through noncompetitive Indirect ELISA (Enzyme Linked Immunosorbent Assay). The antigens on the panel are subject to change without prior notice. The reference range is updated periodically.

Seek advice from healthcare professionals for interpretation of results and before making any dietary change.

Healthcare professionals should be aware of the nature and implication of IgE and IgG testing, and interpret the result along with the allergy or medical history.

This test is for personal health information only and the provided supplementary information is for educational purpose only, it cannot replace any diagnosis and treatment by healthcare professionals.
